

January 25th, 2017
SPREAD Co., Ltd.

**SPREAD will Showcase “Techno Farm™” at CeBIT 2017,
the Largest International IT Business Tradeshow**

SPREAD Co., Ltd. (HQ: Kyoto, Japan; CEO: Shinji Inada; hereinafter, “SPREAD”) will showcase the most advanced vegetable production system “Techno Farm™” at CeBIT 2017 (organized by Deutsche Messe AG) held at Hanover Fairground in Hanover, Germany from March 20th to 24th, 2017.

CeBIT 2017 is the largest international IT business tradeshow with 3,300 exhibitors from 70 countries, and approximately 200,000 attendees (statistics provided by organizer).

SPREAD will join the “Japan Pavilion” which is organized by Japan External Trade Organization to introduce Japanese technologies as a partner country of CeBIT 2017. SPREAD will showcase the innovations and information system of “Techno Farm™”, while seeking potential international partners to collaborate on this system.

This will be a good opportunity to learn about future prospects of “Techno Farm™” and its technologies. Please come and see SPREAD’s booth.

News Release

< "Techno Farm™" >

SPREAD developed the most advanced vegetable production system created by taking advantage of the cultivation techniques and accumulated know-how with the cooperation of technology equipment manufacturers. The birth of many new technologies have come from the world's first large-scale plant factory such as automated cultivation, water recycling, specialized LED lights for plant factories, and environment controls. In addition, significant cost reductions such as labor costs by 50% and energy costs by 30% have been achieved compared to the Kameoka Plant, SPREAD's existing plant factory, which addresses the biggest issue facing plant factories.
